

**Representation Review - Banyule City Council - Response Submission**  
**Liesel Green - Montmorency - 17 Sep 2019**

I would like to write in support of option A. A three ward, three councillor system provides better representation because at least one of the three ward councillors is likely to be available. In situations where your personal politics may differ from an elected representative it is likely that you will find that amongst the three there is at least one person with whom you will find common purpose. I am also in favour of the way in which the 3 ward boundaries have been drawn. The current boundary sees Montmorency split, where option A allows that the community resources can be seen to be dealt with wholistically. The current boundary has allowed a north-south division that is not helpful to building communities, and has led to a perceived inequitable distribution of Council led initiatives. Thank you for the opportunity to give my views on this matter.
