I believe that Option B best represents the community of interest. I have been both a Springvale and Dandenong Councillor representing the Keysborough area for many years. Option B incorporates the predominant area of Keysborough into the same local government boundary instead of being split in two as it is in option A whilst at the same time respecting the common interest of Noble Park. It also would have the effect of reducing in size the "mega" structure Red Gum Ward which is the size currently of a small country. Option B enjoin the adjacent suburbs of Noble Park and Keysborough and provides a greater recognition of community interests and assets than Option A presents which is largely presently the case. Option B is logical reasonable and a significant improvement on reflecting community of interest within a very large municipality.
