I support the proposal of ward zoning to option B. I feel that this option is better suited to the demographics in the area and ensures that the suburbs are not cut up, thus offering a ward that caters to the needs of those in each suburb. Keysborough residents have more similarities to the residents of Noble Park, and the residents of Keysborough are more likely to access Noble Park area for public transport rather than the other areas. Residents of Dandenong and Dandenong North and South are more likely to share facilities along with having similar needs that the ward zoning represents in option B.

I would be very happy if adjustments brought the northern boundary of the Paperback ward down to Issac Road.

With all the increased development of the Keysborough area south of the bypass it is important that the residents in this area can have representatives who support the whole Keysborough area along with fellow residents in Keysborough above the bypass, and thus removes the perceived devided between old and new Keysborough.

Thank you for viewing my submission.
