

Electoral Representation Review - Glenelg Shire Council - Preliminary Submission
Elvia Mendez Lujano - Narrawong - 7 February 2019

The Glenelg Shire council currently has seven councillors, which 6 of them are from Portland, leaving only one councillor representing the north of the shire and the rest of the shire is not having the support that we require in regional large councils. I believe that would be ideal to reduce the number of councillors and go back to a ward structure, where residents from smaller towns can know who to go and not just be able to expect no services in non-PORTLAND towns. Similarly, an electoral structure that includes wards would allow for greater representation for the public in low population density. The proposed split into wards is subdivide GSC into North, South, East, West & Portland. experience has seame at
